### Purpose of the Procedure

Flood Insurance Studies search for geospatial data during Discovery tasks. If needed data are not available, studies might fund the collection of new data and would like to know about other organizations that might share in these costs. Detailed information about the role geospatial data coordination plays in studies is in the *Geospatial Data Coordination*

# State Geospatial Data Coordination Procedure

*Implementation Guide*, which is available at

<<https://hazards.fema.gov/femaportal/docs/GeoDataImplem.pdf>>.

Resources developed through FEMA's geospatial data coordination activities provide information about data and contacts for organizations that have geospatial data that cover large areas (like states) in which many studies are interested. Studies can avoid wasting time with dead-end searches and cold calls by starting with these proven sources of information.

One resource is this Geospatial Data Coordination Procedure. It outlines sources of geospatial data and contact information, preferences for base map data and state geospatial participation in flood insurance studies, information for the project Discovery stage, and other useful information for the State.

If you have questions about this procedure or other geospatial data coordination resources, contact the geospatial data coordination lead in your Regional Support Center (RSC):

Rigel Rucker, Geospatial Data Coordination Lead  
RAMPP Regional Support Center 6  
(940) 735-3334  
[Rigel.Rucker@URS.com](mailto:Rigel.Rucker@URS.com)

We appreciate the help of those who reviewed this document, in particular

Date Procedure last discussed: February 2007

## Default Flood Hazard Base Map for the State

The default base map for flood hazard maps for the State is a vector base map utilizing road centerlines-created/maintained locally by counties with accuracy checked by the Arkansas Geographic Information Office. Assessible through Arkansas's Online Geospatial Clearinghouse – GeoStor, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov).

The secondary choice, based on unavailability of road centerlines, is for an image base map (orthophoto). The State of Arkansas has procured new Aerial Imagery for the entire State at 1m resolution in both natural and CIR. There are also several areas in the State where higher resolution is available. All of these orthophotos are available through the State's Geospatial Clearinghouse – GeoStor, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov).

# State Geospatial Data Coordination Procedure

## Geospatial Data Coverage

Find below information about and links to statewide (and Federal agencies' national) geospatial datasets. The list is provided to save time during Discovery activities when building a list of candidate geospatial datasets available for the study; it is not a prescription of datasets that must be used in a Flood Insurance Study.

### Major State Holdings

#### *Orthophotos*

Dataset name: Statewide Natural Color Orthos (also Statewide CIR Orthos)

Data currentness: 2006, Some Counties 2008 - 2010

Accuracy/Scale: 1m Statewide with local coverages of increased resolution; 1: 12,000

Ground sample resolution: 1m

Horizontal datum: NAD 83UTM - Zone 15N

Fee associated? No

Available for redistribution? Yes

Dataset source: AGIO, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov)

Dataset contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov)

Notes: Obtained leaf off winter of 2005-2006

#### *Transportation (roads, railroads, and airports)*

Dataset name: ACF (Road Centerlines), AHTD RR, BTS Airport Runways

Data currentness: (2007, roads realigned to aeriels) (1999, airports) Updated 2010

Accuracy/Scale: 1:12,000

Horizontal datum: NAD 83 UTM – Zone 15N, NAD83 Lat/Long, NAD84 Lat/Long, Arkansas State Plane North Feet, Arkansas State Plane South Feet

Fee associated? No

Available for redistribution? Yes

Are road names part of the dataset? Yes

Dataset source: AGIO, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov)

Dataset contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov)

Notes: Partial Coverage Available for Street Centerlines, availability will be made known to RSC/Contractors as counties are needed.

#### *Hydrography (rivers, streams, lakes, and shorelines)*

Dataset name: High Resolution: National Hydrography Dataset

Data currentness: 2009

Accuracy/Scale: These maps were compiled to meet National Map Accuracy Standards for 1:24,000-scale maps.

Horizontal datum: NAD 83 UTM – Zone 15N, NAD83 Lat/Long, NAD84 Lat/Long, Arkansas State Plane North Feet, Arkansas State Plane South Feet

Fee associated? No

Available for redistribution? Yes

Are hydrography names part of the dataset? Yes, where available

Dataset source: AGIO, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov)

Dataset contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov)

# State Geospatial Data Coordination Procedure

Notes: The National Hydrography Dataset also is available through USGS; see <http://nhd.usgs.gov>.

## *Political boundaries (county, municipal)*

Dataset name: Counties 2006, City Limits

Data currentness: 2010

Accuracy/Scale: 1:12,000

Horizontal datum: NAD 83 UTM – Zone 15N, NAD83 Lat/Long, NAD84 Lat/Long, Arkansas State Plane North Feet, Arkansas State Plane South Feet

Fee associated? No

Available for redistribution? Yes

Dataset source: AGIO, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov)

Dataset contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov)

Notes: None

## *Publicly owned lands (national, state, and local parks, forests, etc)*

Dataset name: Public Land Boundaries (AHTD), Wildlife Management Areas 2005 (AGFC)

Data currentness: 2006

Accuracy/Scale: Best Available (varies)

Horizontal datum: NAD 83 UTM – Zone 15N, NAD83 Lat/Long, NAD84 Lat/Long, Arkansas State Plane North Feet, Arkansas State Plane South Feet

Fee associated? No

Available for redistribution? Yes

Dataset source: AGIO, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov)

Dataset contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov)

Notes: None.

## *Public land survey system (PLSS) (township and section lines)*

Dataset name: PLSS 24k Township Range

Data currentness: 2009

Accuracy/Scale: 1:24,000

Horizontal datum: NAD 83 UTM – Zone 15N, NAD83 Lat/Long, NAD84 Lat/Long, Arkansas State Plane North Feet, Arkansas State Plane South Feet

Fee associated? No

Available for redistribution? Yes

Dataset source: AGIO, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov)

Dataset contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov)

Notes: None.

## *Cadastral (parcels)*

Dataset name: Parcel Polygon and Centroid

Data currentness: 2010

Accuracy/Scale: Under construction

Horizontal datum: NAD 83 UTM – Zone 15N, NAD83 Lat/Long, NAD84 Lat/Long, Arkansas State Plane North Feet, Arkansas State Plane South Feet

Fee associated? No

Available for redistribution? Yes

# State Geospatial Data Coordination Procedure

Dataset source: AGIO, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov)

Dataset contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov)

Notes: None

## *Terrain (elevation)*

Dataset name: 2006 Statewide DEM, raw x,y,z ASCII files, 5 meter post spacing

Data currentness: 2006

Accuracy/Scale: 5 meter DEM/ 3.88 meter vertical RMSE, and 5 Meter Horizontal RMSE

Vertical datum: NAVD 88

Fee associated? No

Available for redistribution? Yes

Dataset source: AGIO, [www.geostor.arkansas.gov](http://www.geostor.arkansas.gov)

Dataset contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov)

Notes: See additional information under AGIO Statement Regarding 2006 Elevation Databelow.

## *Data Distribution Process for State Data*

All GIS data for FEMA's Risk MAP Program will be obtained through the Arkansas Geographic Information Office (AGIO). The AGIO serves as the State GIS Coordinating entity and any datasets that will be used will come through this office and/or the State's Spatial Data Clearinghouse GeoStor, which is maintained by the AGIO. Data available through the AGIO can be used without licensing considerations or fees.

Arkansas GIS Gateway: <http://www.gis.state.ar.us/>

GeoStor: <http://www.geostor.arkansas.gov>

## *Useful Risk MAP Discovery Data Sources*

Preliminary information on Discovery data sources is provided in this document to reduce the level of effort needed on each subsequent Discovery data collection effort. Coordination with local community sponsors for additional local data still remains an integral part of Discovery and local data should be used where appropriate.

The *National Discovery Data Coordination Procedure* document contains information on data resources available from other Federal agencies (OFAs), including those that FEMA maintains at the national level, and should be used in conjunction with this State Geospatial Data Coordination Procedure document. In addition, FEMA and its contractors have created a geospatial Discovery Data Repository to host data that are not readily accessible through direct sources such as Web sites or subscription services and/or are not updated on a frequent basis. Instructions on accessing the Discovery Data Repository are given in the *National Discovery Data Coordination Procedure* document.

Table 1 identifies data resources that are available at the regional and State levels, and also if there are no data available other than the national datasets. Resources in this table have been identified as appropriate for Discovery projects and may not represent the best data sources for FIRM production (please see the Major State Holdings section of this document for geospatial data that meets FIRM production requirements).

# State Geospatial Data Coordination Procedure

Table 1. Discovery Data Sources

Data	Data Source	Location
Watershed boundaries	National	See <i>National Discovery Data Coordination Procedure</i>

## Federal Nationwide Geospatial Data Holdings

Information about nationwide holdings and programs of Federal agencies is available from the Mapping Information Platform web site at <https://hazards.fema.gov/femaportal/docs/ProgFacts.pdf>.

## Finding and Accessing Other Existing Geospatial Data

Find below information about and links to ways of searching for additional geospatial data available for the State. These capabilities can be useful for finding geospatial data other than

# State Geospatial Data Coordination Procedure

the statewide and Federal data listed above, including those of special governments, counties and parishes, municipalities, tribes, universities, and other organizations.

## Clearinghouses and Inventories for the State

Arkansas GIS Gateway: <http://www.gis.state.ar.us/>

GeoStor: <http://www.geostor.arkansas.gov>

Contact: Shelby Johnson, AGIO, at 501-682-2767, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov), National Digital Orthophoto Program (NDOP) and National Digital Elevation Program (NDEP) Tracking Systems

These systems allow the search of orthophoto and elevation project information entered by federal and other organizations. To access the NDOP system, go to the NDOP web site at <http://www.ndop.gov> and follow the link “Project Tracking.” For the NDEP system, go to the NDEP web site at <http://www.ndep.gov> and follow the link “Project Tracking.”

## TED Query Tool

This tool provides access to information about Federal, state, and local government agency and private sector data holdings gathered by the Census Bureau.

Note: The AGIO closely coordinated with the Census Bureau Regional Geographer on updates to the MAF/MOD TIGER enhancement database.

## Geospatial One-Stop

Geospatial One-Stop, available at <http://www.geodata.gov>, provides access to geospatial data from many sources. Two parts of the site that should be investigated are the “data categories” for existing data and the “marketplace” for data that are planned or in-work and for potential partners for new data collection activities.

## Working with People

### Useful State and Federal Contacts

The main contacts for the State’s geospatial activities and Federal agencies’ representatives in State are available on the Mapping Information Platform web site at <https://hazards.fema.gov/contacts/statecontacts/contacts.asp?page=AR>.

### Involving the State’s Geospatial Coordinator in Flood Studies

The state has strong involvement with FEMA on Discovery efforts related to identifying base map and terrain data suitable for flood mapping purposes.

E-mail correspondence is requested to be sent from Region VI and the RSC to the State representative to keep them up to date on Flood Mapping activities in the State of Arkansas.

### State Coordination Process for Building Geospatial Partnerships

The Arkansas Geographic Information Systems Board at <http://www.gis.arkansas.gov/GISB/gisb.html>

# State Geospatial Data Coordination Procedure

## Finding Local Geospatial Contacts

Local contacts, including those from special government districts (for example, a regional planning commission); counties, parishes, or equivalent governments; tribes, municipal governments; and other organizations (for example, local universities) also have geospatial data that can help a Flood Insurance Study. Contact information is available from the FEMA archive and web searches at government link portals such as <<http://www.statelocalgov.net>>.

The state has regional planning commissions/councils of government. Generally, cities play a larger role in GIS development than do the counties.

The State also maintains information about local geospatial contacts:

Local contacts for each of the counties/cities that develop and or maintain spatial data is identified to the Production and Technical Services contractor during the Discovery period. The state maintains a statewide GIS contacts list in a Web accessible format.

Contact or URL information for list (if able to be obtained): <http://www.gis.state.ar.us>

The levels of government in the list are:

- a. County
- b. State

## Provide Feedback on This Procedure

When you find information in this Procedure or in other FEMA or State resources that are outdated, please tell the geospatial data coordination lead in the Regional Support Center what was wrong and the correct information (if you know it). Use the contact information for the lead listed in the section.

The lead will use your feedback to update this Procedure.

## Other Useful Information

### AGIO Statement Regarding 2006 Elevation Data

(The following statement was provided by the Arkansas Geographic Information Office)

#### **“2006 Digital Elevation Model Product Limitations and Appropriate Use**

In 2005 the Arkansas State Land Information Board (ASLIB) requested the Arkansas Geographic Information Office (AGIO) prepare for an update of the digital orthoimagery of the state. Subsequently, the AGIO entered into a contract with EarthData International to conduct a 1m statewide ortho imagery acquisition utilizing a digital sensor (Leica ADS40) during the 2006 leaf off flying season. Due to the technology inherent in the ADS40 sensor a digital elevation model (DEM) was also obtained at the same time as the imagery, producing a 5m (5m post spacing xyz file) DEM. The new imagery and elevation data is planned for public release the first quarter of 2007.

# State Geospatial Data Coordination Procedure

The digital elevation model (DEM) being delivered as a part of the 2006 Arkansas Digital Ortho Program was generated for the purpose of increasing the horizontal accuracy of the orthoimagery product. The DEM being delivered shall meet the following specifications:

- 1: Vertical Accuracy shall meet or exceed 7.6 meters at a 95% confidence level
- 2: Horizontal Accuracy shall meet or exceed 6 meters at a 95% confidence level
- 3: Delivery Format shall be an ASCII point file containing xyz coordinates

Meeting this standard does ***not imply*** hydrologic integrity, and this data product is not suitable for detailed hydrologic analysis. For evaluation purposes the table below provides a comparison of the 5m product and other elevation data that is presently available in the state.

Product	Vertical Accuracy	Horizontal Accuracy	Resolution / Post-Spacing	Source
30 meter DEM	7 meter RMSE	None published <sup>1</sup>	30 meter	USGS
10 meter DEM	7 meter RMSE <sup>2</sup>	None published <sup>1</sup>	10 meter	USGS
<b>5 meter DEM</b>	<b>3.88 meter RMSE <sup>3</sup></b>	<b>5 meter RMSE</b>	<b>5 meter</b>	<b>AGIO Arkansas Digital Ortho Program</b>
1 meter LiDAR collect	15cm RMSE	3.08 meter RMSE	1 meter	These results are general and would be determined based upon flying height and sensor used

Users may wish to conduct additional value added processing for other purposes. Derived products such as contour intervals can be generated in numerous ways. To this end the AGIO and EarthData International will refrain from speculating what contour intervals might be achieved with additional processing. DEM users should refer to the ASPRS publication *Digital Elevation Model Technologies and Applications* to learn more about the appropriate uses of this DEM product.

The ASLIB and AGIO are providing the updated elevation data product with x, y, & z values to users. However, users should be warned that value added processing to increase accuracies, or to generate derived products, will require the addition of ground control, a revised aero-triangulation, and stereo compiled 3-Dimensional break-lines. These needs should be reviewed on a case by case basis and will require cost estimates from the private sector.

Contact Information: Shelby Johnson, GIS Program Manager, Arkansas Geographic Information Office, [Shelby.Johnson@arkansas.gov](mailto:Shelby.Johnson@arkansas.gov).

<sup>1</sup>The USGS does not publish a horizontal accuracy for their DEMs. This information can be tracked on a Quad by Quad basis through the USGS.

<sup>2</sup>Most 10m DEMs in the State of Arkansas are interpolated from the 30m DEMs, therefore their vertical accuracy is assumed to be equal to the accuracy of the original 30m DEMs.

<sup>3</sup>These specifications exceed all statewide DEM specifications currently available.
