

Aspera Connect Download Instructions for MIP Studies

FEMA

Aspera Connect

- Using Aspera software to help users manage and execute the upload of large data files to the MIP
- Rather than sending hard drives to MIP help, most users will be able to directly upload the majority of the files associated with a project
- For better upload performance and file uploads larger than 2GB use the **Managed Upload** option for upload within the MIP Studies Platform

Install Aspera Connect

➤ To start the use of Aspera a user needs to select the Manage Upload button within the Submit Data sections of the MIP Studies Task Screens

Submit Data

Upload a data file and submit for validation. [Download Sample Metadata Template](#) to view the data file submission format.

For better upload performance and file uploads larger than 2GB, use the Managed Upload option for upload. You will be prompted to install Aspera client.

Upload Data File

Choose File No file chosen

Direct Upload

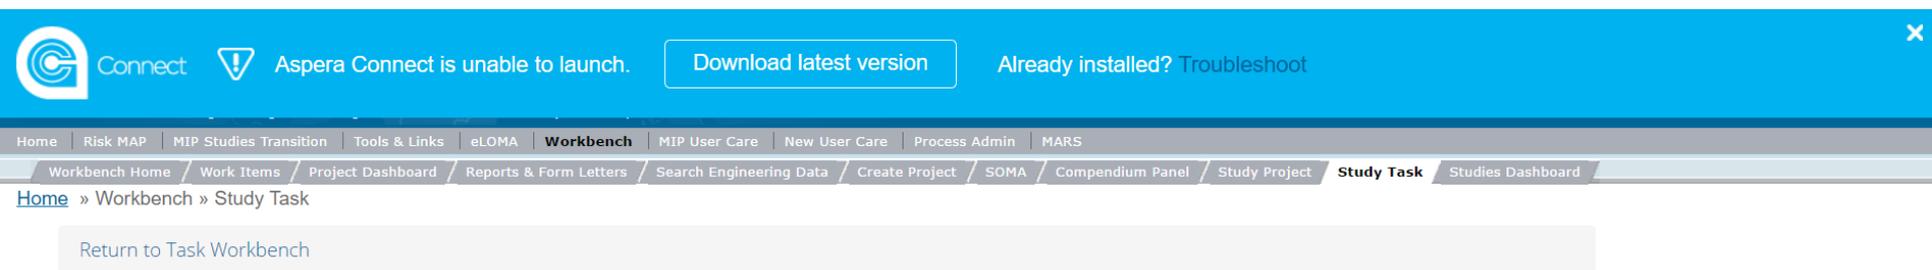

Managed Upload

Install Aspera Connect

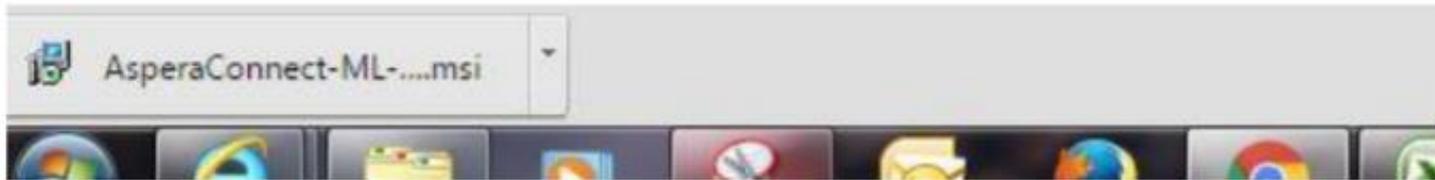

- If Aspera Connect is not downloaded on your computer, the following screen will pop up at the top of the screen when attempting to download
- **NOTE:** you must scroll up manually to the top of the screen to see the notice

The screenshot shows a blue notification banner at the top of a web application. On the left is the Aspera Connect logo. The text in the banner reads: "Aspera Connect is unable to launch." To the right of this text is a button labeled "Download latest version" and a link that says "Already installed? Troubleshoot". A close button (X) is in the top right corner of the banner. Below the banner is a navigation bar with various menu items: Home, Risk MAP, MIP Studies Transition, Tools & Links, eLOMA, Workbench (highlighted), MIP User Care, New User Care, Process Admin, and MARS. Below the navigation bar is a breadcrumb trail: Home » Workbench » Study Task. At the bottom of the screenshot is a button labeled "Return to Task Workbench".
