

Below are questions and answers that were discussed on the Studies Workflow Open Conference Call on January 20, 2011.

As a reminder, MIP Help can be reached via e-mail at [miphelp@riskmapcds.com](mailto:miphelp@riskmapcds.com) or telephone at 1-877-FEMA-MAP.

<b>Issue/Questions</b>	<b>Answers</b>
A project reached the Post Preliminary Map Production activity and the data expired in the middle of the Indefinite Delivery/Indefinite Quantity (IDIQ) contract. Another provider picked up the contract. What is the best way to handle this?	Draft guidance will be created and presented on the MIP Champions and Black Belts call. The resolution will heavily involve MIP Help and previous MIP Help tickets submitted to resolve similar situations will be included in the guidance.
Is anyone accepting delivery of LiDAR data? Have any Production and Technical Services (PTS) organizations started receiving data?	LiDAR data is too large to upload to the MIP. This issue will be discussed on the next MIP Champions and Black Belts call.
