State Geospatial Data Coordination Procedure

This page intentionally left blank

State Geospatial Data Coordination Procedure

Purpose of the Procedure

Flood insurance studies search for geospatial data during pre-scoping and scoping tasks. If needed data are not available, studies might fund the collection of new data and would like to know about other organizations that might share in these costs. Detailed information about the role geospatial data coordination plays in studies is in the *Geospatial Data Coordination Implementation Guide*, which is available at https://hazards.fema.gov/femportal/docs/GeoDataImplem_V3.pdf, and in *Scoping Guidelines: Pre-scoping and the Scoping Meeting*, which is available through the Regional Support Center (RSC).

Resources developed through FEMA's geospatial data coordination activities provide information about data and contacts for organizations that have geospatial data that cover large areas (like states) in which many studies are interested. Studies can avoid wasting time with dead-end searches and cold calls by starting with these proven sources of information.

One resource is this Geospatial Data Coordination Procedure. It outlines sources of geospatial data and contact information, preferences for base map data and state geospatial participation in studies, and other useful information for the State.

If you have questions about this procedure or other geospatial data coordination resources, contact the geospatial data coordination lead in your Regional Support Center:

Brian Killen, Geospatial Data Coordination Lead
Region V Service Center
(312) 262-2283
brian.killen@starr-team.com

Default Flood Hazard Base Map for the State

The default base map for flood hazard maps for the State is an image base map (orthophoto).

Geospatial Data Coverage

Find below information about and links to statewide (and Federal agencies' national) geospatial datasets. The list is provided to save time during pre-scoping and scoping activities when building a list of candidate geospatial datasets available for the study; it is not a prescription of datasets that must be used in a flood insurance study.

State Geospatial Data Coordination Procedure

Datasets for DFIRM Production

Orthophotos

Dataset name: Michigan Georef NAIP Digital Ortho

Data currentness: 2005

Accuracy/Scale: Map scale meets national map accuracy standards for the scale of 1:12,000; accuracy +/-33.3 feet

Ground sample resolution: 1 meter

Horizontal datum: NAD 83.

Fee associated? No.

Available for redistribution? Yes for distribution, but redistribution policy not available.

Dataset source: Michigan Department of Natural Resources (MDNR), Forestry, Mineral and Fire and Mineral Management; <http://www.mcgi.state.mi.us/doqqviewer/mcgi.aspx>

Dataset contact: Michigan Department of Natural Resources (MDNR), Forestry, Mineral and Fire and Mineral Management; Sherman Hollander, (517) 373-9123;

hollands@state.mi.us or Sally Huston, Geographic Technician, Michigan Center for Geographic Information, 111 S. Capitol Avenue, 10th floor, Lansing, MI 48913; (517) 373-7910; hustons@michigan.gov

Notes: (1) The aerial image files in this archive are copies of standard DOQs from the National Digital Cartographic Data Base that have been repositioned to the Michigan GeoRef coordinate system. Currently, DOQs in Michigan have been produced from two statewide flights that were initiated in 1992 and 1998 under the National Aerial Photography Program (NAPP) administrated by USGS.

(2) Additional high resolution imagery maybe available for counties or regional planning commissions.

Transportation (roads, railroads, and airports)

Dataset name: Michigan Geographic Framework

Data currentness: 2000

Accuracy/Scale: 1:24,000.

Horizontal datum: NAD 83.

Fee associated? No.

Available for redistribution? Yes for distribution, but redistribution policy not available.

Are road names part of the dataset? Yes.

Dataset source: Michigan Center for Geographic Information at

<http://www.mcgi.state.mi.us/mgdl>

Dataset contact: Laura Blastic, Geographic Specialist, Michigan Center for Geographic Information, 111 S. Capitol Avenue, 10th floor, Lansing, MI 48913; (517) 373-7910;

Blasticl@michigan.gov

Hydrography (rivers, streams, lakes, and shorelines)

Dataset name: National Hydrography Dataset (NHD)

Data currentness: varies based on date of USGS topographic map used as the source

Accuracy/Scale: 1:24,000

Horizontal datum: NAD 83

State Geospatial Data Coordination Procedure

Fee associated? No
Available for redistribution? Yes
Are hydrography names part of the dataset? Yes
Dataset source: USGS at <http://nhd.usgs.gov>
Dataset contact: NHD@usgs.gov

Political boundaries (county, municipal)

Dataset name: Michigan Geographic Framework
Data currentness: 2006
Accuracy/Scale: 1:24,000
Horizontal datum: NAD 83
Fee associated? No.
Available for redistribution? Yes for distribution, but redistribution policy not available.
Dataset source: Michigan Center for Geographic Information at <http://www.mcgi.state.mi.us/mgdl/>
Dataset contact: Laura Blastic, Geographic Specialist, Michigan Center for Geographic Information, 111 S. Capitol Avenue, 10th floor, Lansing, MI 48913; (517) 373-7910; Blasticl@michigan.gov

Publicly owned lands (national, state, and local parks, forests, etc)

Dataset name: DNR Land and Mineral Ownership
Data currentness: Maintained weekly
Accuracy/Scale: 1:24,000
Horizontal datum: NAD 83
Fee associated? No.
Available for redistribution? Yes for distribution, but redistribution policy not available.
Dataset source: Michigan Center for Geographic Information at <http://www.mcgi.state.mi.us/mgdl/>
Dataset contact: Laura Blastic, Geographic Specialist, Michigan Center for Geographic Information, 111 S. Capitol Avenue, 10th floor, Lansing, MI 48913; (517) 373-7910; Blasticl@michigan.gov
Notes: (1) Ownership is mapped to the quarter-quarter section level.
(2) The State is preparing to release a dataset containing the proclaimed boundaries of state lands. Contact the Michigan Center for Geographic Information at (517) 373-7910 for information about the availability of these data.

Public land survey system (PLSS) (township and section lines)

Dataset name: Public Land Survey Sections
Data currentness: 1998
Accuracy/Scale: 1:24,000
Horizontal datum: NAD 83
Fee associated? No
Available for redistribution? Yes for Distribution, but redistribution policy not available.
Dataset source: Michigan Center for Geographic Information at <http://www.mcgi.state.mi.us/mgdl/>

State Geospatial Data Coordination Procedure

Dataset contact: Shirley Businski, Geographic Analyst, Michigan Center for Geographic Information, 111 S. Capitol Avenue, 10th floor, Lansing, MI 48913; (517) 373-7910; businskis@michigan.gov

Cadastral (parcels)

No coverage available.

Terrain (elevation)

Dataset name: Digital Raster Graphics (Topographic Map) (contours on scanned USGS topographic maps)

Data currentness: Currentness of map features varies depending on the date of the printed USGS 7.5 minute quadrangles.

Accuracy/Scale: 1:24,000

Vertical datum: NAD 83

Fee associated? No.

Available for redistribution? Yes for distribution, but redistribution policy not available.

Dataset source: MDNR, Land and Mineral Services Division, Resource Mapping and Aerial Photography <http://www.mcgi.state.mi.us/mgdl/>

Dataset contact: Gary Taylor, Geographic Specialist, Michigan Center for Geographic Information, 111 S. Capitol Avenue, 10th floor, Lansing, MI 48913; (517) 373-7910; taylorgl@michigan.gov

Notes: Michigan DRG 24k data is georectified TIFF (5.0) files that have been saved as 8-bit color images. The pixel resolution of each TIFF image has been set to 2.5 meters+0.1meter (approximately 250 dpi). The horizontal accuracy of the original scanned paper quadrangles meets National Map Accuracy Standards for 1:24,000-scale maps.

Useful Risk MAP Discovery Data Sources

Preliminary information on Discovery data sources is provided in this document to reduce the level of effort needed on each subsequent Discovery data collection effort.

Coordination with local community sponsors for additional local data still remains an integral part of Discovery and local data should be used where appropriate.

The National Geospatial Data Coordination Procedure document contains information on data resources available from other Federal agencies (OFAs), including those that FEMA maintains at the national level, and should be used in conjunction with this State Geospatial Data Coordination Procedure document. In addition, FEMA and its contractors have created a geospatial Discovery Data Repository to host data that are not readily accessible through direct sources such as Web sites or subscription services and/or are not updated on a frequent basis. Instructions on accessing the Discovery Data Repository are given in the national Geospatial Data Coordination Procedure document.

Table 1 identifies data resources that are available at the regional and State levels, and also if there are no data available other than the national datasets. Resources in this table have been identified as appropriate for Discovery projects and may not represent the best data

State Geospatial Data Coordination Procedure

sources for FIRM production (please see the Preferred Base Map Sources section of this document for geospatial data that meets FIRM production requirements).

Table 1. Discovery Data Resources

Data	Data Source	Location
Watershed boundaries	National	Discovery Data Repository
Jurisdictional boundaries	National	Discovery Data Repository
Tribal land boundaries	National	Discovery Data Repository
State lands	Regional/State/Local	
Federal lands	National	Discovery Data Repository
Major roads	Regional/State/Local National	Discovery Data Repository
Streams	Regional/State/Local National	Discovery Data Repository
Coastal Barrier Resource Areas	National	Discovery Data Repository
Coordinated Needs Management Strategy	National	See National Operating Procedure
Topographic/ bathymetric data	National	See National Operating Procedure
AAL data from HAZUS	State	https://starrtrac.pbsjteamaccess.com/library/AAL/Forms/AllItems.aspx Contact the RSC if help is needed retrieving the data.
Coverage areas for known community and Tribal risk assessment data	Regional/State/Local	
Status of Hazard Mitigation Plans	Regional	Richard.Foody@fema.dhs.gov
Flood control structure data	National	See National Operating Procedure
Locations of stream gages	National	Discovery Data Repository
Locations of past flood claims and repetitive loss properties	CIS Report	Contact the geospatial data coordination lead at your RSC referenced earlier in this document.
Locations of clusters of Letters of Map Change	National	See National Operating Procedure
Known flooding issues not represented on effective FIRMs or listed in Coordinated Needs Management Strategy database	Regional/State/Local	
Areas of planned development	Regional/State/Local	

State Geospatial Data Coordination Procedure

Data	Data Source	Location
Areas of land use change datasets	National	
	Regional/State/Local	
Locations of ongoing projects or updated stream studies (e.g. highway improvements)	Regional/State/Local	
Locations of wave and tide gauges	National	N/A
Locations of wind gauges	National	N/A
Proposed inland limit of the Primary Frontal Dune, if present	Regional/State/Local	N/A
Locations of any beach nourishment or dune restoration projects	SLOSH Zones	N/A
Comparison of preliminary stillwater elevations with effective stillwater elevations	Regional/State/Local	
Available effective study data	National	See National Operating Procedure
Orthophotography	National	See National Operating Procedure
Proposed discussion areas, problem areas, areas of proposed mitigation projects	Regional/State/Local	
Land use and soil information	Land Use	
	Soils	See National Operating Procedure
Reference points to locate areas with flooding issues	Regional/State/Local	
Hydraulic structures	Culverts	Regional/State/or Local
	Levees, Dams, Bridges	See National Operating Procedure
Coastal structures, including flood protection structures, shoreline structures, manmade embankments, surge conveyance pathways, and shoreline change data	Regional/State/Local	N/A
Local structure and topographic data from the existing hazard mitigation plans	Regional/State/Local	

State Geospatial Data Coordination Procedure

Data	Data Source	Location
Historic inundation areas and high water marks	Historic Riverine Inundation Areas	See National Operating Procedure
	Storm Surge Inundation Areas	See National Operating Procedure
	High Water Marks	Regional/State/ or Local
Clusters or locations of Individual Assistance/Public Assistance grants and locations of grant projects completed, planned, or underway	National	See National Operating Procedure
Locations of projects and structures completed or planned for FEMA Hazard Mitigation Assistance grant programs or mitigation funds from other agencies or entities, such as the Small Business Administration	National	See National Operating Procedure
Other information on FEMA grants, as described in G&S Appendix I	Regional/State/Local	HMA Tracking Tool
Any data deficiencies identified in hazard mitigation plans	Regional/State/Local	
Information from FloodSmart on market penetration	FEMA	http://www.floodsmart.gov/floodsmart/
Community Assistance Visits / Community Assistance Contacts	National	Discovery Data Repository
Community Rating System class information	National	See National Operating Procedure
Information from other Federal agencies	National Only	See National Operating Procedure
Information from State agencies, non-profit organizations, universities, etc.	Regional/State/Local	
Current community plans, ordinances, or programs to alleviate flooding or manage stormwater	Regional/State/Local	
Other known hazards with geographical boundaries (e.g. earthquake faults)	Tsunami	Discovery Data Repository
	Landslide	Discovery Data Repository
	Volcanic Eruptions	Discovery Data Repository
	Wildfire	Discovery Data Repository

State Geospatial Data Coordination Procedure

Data	Data Source	Location
Information on active disasters	Regional/State/Local	Rusty.Rickart@fema.dhs.gov
Campgrounds, recreational areas, emergency access routes, etc.	National	Discovery Data Repository
Federal Grants Pre /Post Disaster	Regional	Greg.Tatara@fema.dhs.gov
Critical Facilities	Regional	Lee.Traeger@fema.dhs.gov

Data Distribution Process for State Data

Michigan Terms of Use and Linking Policy

The Michigan.gov web portal is owned and operated by the State of Michigan and provided as a public service to the citizens of Michigan and customers throughout the world. The use of the content, images and logos on the Michigan.gov web portal on any other web site or networked computer environment is prohibited.

Some of the materials on the web portal, for example the major highway constructions maps, may be saved on any single personal computer for personal, non-commercial use only. All copyrighted material and other means of proprietary or copyright identification must be kept intact and unmodified. Modification of the materials or use of the materials for purposes not granted by the State of Michigan is a violation of Michigan's copyright and other proprietary rights.

Michigan.gov and Other State Links

Michigan provides links to other organizations through this website. These links are provided for additional information as a service to our customers. In providing these links, Michigan does not endorse the content, products, services or viewpoints expressed by these external sites. Once you leave Michigan's website and link to an external site, the Michigan Internet policies no longer apply and you will be subject to the new site's policies.

Michigan provides links to the following types of organizations:

- Links to Other Governmental Units & Educational Institutions - Michigan provides links to other federal, state, and local governmental units that provide additional services and information that users of Michigan's site may find of interest. Links are also provided to educational institutions including K-12 school districts, intermediate school districts (ISDs), community colleges, and universities.

State Geospatial Data Coordination Procedure

- Links to Private Organizations - Michigan provides links to private organizations if these organizations offer services that complement the information or services offered by Michigan. The determination of whether to establish links to a private organization's website is made on a case-by-case basis.
- Links to Non-Profit Organizations - Michigan provides links to non-profit organizations that users of Michigan's site may find of interest. The determination of whether to establish links to non-profit organizations is made on a case-by-case basis.

Linking to Michigan.gov

Linking to the Michigan.gov portal is permitted under limited conditions. If you link to this site, you may not portray any person or subject in a false or misleading light. You must also refrain from creating frames, or using other visual altering tools, around the Michigan.gov pages. Lastly, you may not imply that the state of Michigan is endorsing your product or services.

Federal Nationwide Geospatial Data Holdings

Information about nationwide holdings and programs of Federal agencies is available from the Mapping Information Platform web site at <https://hazards.fema.gov/femaportal/docs/ProgFacts.pdf>.

Finding and Accessing Other Existing Geospatial Data

Find below information about and links to ways of searching for additional geospatial data available for the State. These capabilities can be useful for finding geospatial data other than the statewide and Federal data listed above, including those of special governments, counties and parishes, municipalities, tribes, universities, and other organizations.

Clearinghouses and Inventories for the State

Michigan CGI (Center for Geographic Information) Geographic Data Library Catalog at <http://www.mcgi.state.mi.us/mgdl/> serves as the state's repository of digital geographic information. This site currently contains over 60 unique statewide datasets including the state's base map (MI Geographic Framework), aerial imagery, geology, hydrography, land ownership, topography, and much more.

Michigan State University Map Library at <http://www2.lib.msu.edu/branches/map/index.jsp> provides coverage of state boundary data, historical county boundary data, elevation data, and environmental data.

State Geospatial Data Coordination Procedure

National Digital Orthophoto Program (NDOP) and National Digital Elevation Program (NDEP) Tracking Systems

These systems allow the search of orthophoto and elevation project information entered by federal and other organizations. To access the NDOP system, go to the NDOP web site at <http://www.ndop.gov> and follow the link “Project Tracking.” For the NDEP system, go to the NDEP web site at <http://www.ndep.gov> and follow the link “Project Tracking.”

TED Query Tool

This tool provides access to information about Federal, state, and local government agency and private sector data holdings gathered by the Census Bureau. It is available through the geospatial data coordination lead at the Regional Support Center.

Geospatial One-Stop

Geospatial One-Stop, available at <http://www.geodata.gov>, provides access to geospatial data from many sources. Two parts of the site that should be investigated are the “data categories” for existing data and the “marketplace” for data that are planned or in-work and for potential partners for new data collection activities.

Working with People

Useful State and Federal Contacts

The main contacts for the State’s geospatial activities and Federal agencies’ representatives in State are available on the Mapping Information Platform web site at <https://hazards.fema.gov/contacts/statecontacts/contacts.asp?page=MI>

Additional useful contacts for the State can be found at Michigan Center for Geographic Information (CGI), Michigan Department of Information Technology, Romney Building, 10th Floor, 111 South Capitol Avenue, Lansing, MI 48913; (517) 373-7910; see <http://www.michigan.gov/cgi> for more information.

Involving the State’s Geospatial Coordinator in Flood Studies

Contact Everett Root, Geo-Data Services Section Manager at roote@michigan.gov to involve State’s Geospatial Coordinator in Flood Studies.

State Geospatial Data Coordination Procedure

State Coordination Process for Building Geospatial Partnerships

The Michigan Center for Geographic Information provides several of outreach and partnership opportunities. See <http://www.michigan.gov/cgi> for more information.

SEMCOG (Southeast Michigan Council of Governments) GIS:

<http://www.semcog.org/>

SEMCOG's GIS capabilities are widely used throughout the region as communities with and without their own GIS technologies identify needs for effective planning tools. Communities without GIS benefit from the SEMCOG partnership by using its data in their planning processes. Communities with their own detailed, parcel-based systems take advantage of SEMCOG's wider vision, determining where and how they fit into the regional context. The idea of sharing data in partnership with one another is the future of GIS within the region. SEMCOG facilitates communication among GIS professionals throughout Southeast Michigan by hosting quarterly meetings of the Southeast Michigan GIS User Group.

Finding Local Geospatial Contacts

Local contacts, including those from special government districts (for example, a regional planning commission); counties, parishes, or equivalent governments; tribes, municipal governments; and other organizations (for example, local universities) also have geospatial data that can help a flood insurance study. Contact information is available from the FEMA archive and web searches at government link portals such as <http://www.statelocalgov.net>.

The Michigan Center for Geographic Information provides a listserv. See the Outreach and Promotion link at <http://www.michigan.gov/cgi>.

Provide Feedback on This Procedure

When you find information in this Procedure or in other FEMA or State resources that are outdated, please tell the geospatial data coordination lead in the Regional Support Center what was wrong and the correct information (if you know it). Use the contact information for the lead listed in the section Purpose of the Procedure.

The lead will use your feedback to update this Procedure.
