

Meeting Minutes for May 15th, 2014

There are two purposes to these bi-monthly calls:

1. Provide updates that may affect MIP Users
2. Provide a forum for MIP Users to ask questions and raise concerns to their peers as well as address challenges

Updates:

- Dan Horner gave a reminder that the MIP DVT and Metadata Validation Update was released on May 2nd
 - Resources on the scope of the update are available on [MIP User Care](#)
 - For questions on DVT email Dan Horner (Daniel.Horner2@riskmapcds.com)
- Harry Oppenheim announced the upcoming MIP Password Auto Password Reset Service Pack, which will be released on June 27th
 - The service pack will allow MIP users to do the following within the MIP:
 - Retrieve your username by having it sent to your email
 - Reset your password using a challenge question and answer
 - New Manage User Profile tab where you can change your challenge question, challenge answer, and email address associated with your account
 - Question: Will password still expire?
 - Yes
 - Question: Will I only have one password between the MIP and Citrix?
 - No. Citrix is unaffected by this service pack. You will need to continue to use the same processes for resetting your Citrix password. As a reminder, Citrix will be reverting to Read-Only with the release of the MIP File Server Re-Architecture and Enhanced Search Release on June 20th
 - Question: Will the new password changes take place when a user forgets or will there be an initial setup prompting users?
 - There will be an initial setup where users create their challenge question and answer. This setup will occur the first time a user logs into the system after the release
 - Question: What is a sample question?
 - We don't have the list of sample questions yet, but they will be similar to ones found on other websites
- Dmitriy Zakharov presented on MIP Enhanced Search and Data Upload changes with the upcoming MIP File Server Re-Architecture and Enhanced Search Release
 - The presentation is available for download on [MIP User Care](#)
 - Question: How would we test what the public sees? Does the public search w/o a login?
 - Yes. The public search doesn't require a login

- Question: LOMR H+H would not be publically downloadable if it is uploaded straight from the Online LOMC, but we want to make H+H available. Is that ok?
 - In order to make Revisions Hydraulics and Hydrology Models publicly downloadable, you must upload them through Data Upload
- Question: The H&H models uploaded during data development activities may be altered after prelim, however there isn't another prompted upload opportunity during post-prelim, other than the Tools & Links for TSDN... how will draft information be excluded from public access?
 - You will need to contact MIP Help (miphelp@riskmapcnds.com) to replace the old model and CC your regional Champion, Black Belt, or RPML
- Question: What if the ACCCONST value is accidentally set to restricted for the preliminary metadata. Will this impact what is viewable / downloadable on the MSC website or only impacts the public's search?
 - The ACCCONST value has no effect on whether the content is available on the MSC
